

Doosan Forklift Parts

Doosan Forklift Part - Doosan Infracore Company Ltd. is a transnational company consisting of Diesel Engines, Defense Industry products, Industrial Vehicles, Construction Equipment and Machine Instruments and Mechanization Systems.

Their United States affiliate, Doosan Infracore America Corporation, operating in Suwanee, Georgia houses a 170,000 square foot production facility, home to a Compact Equipment and Construction division. Cleveland, Frisco houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer requirements.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent dealers moving forklift equipment and materials handling equipment. This system permits Doosan Infracore America to aggressively compete in this competitive market. The forklift product line remarkably includes 63 distinctive models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous truck models vary from 3,000 to 33,000 lbs. All vehicles are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing lift truck company in the North American marketplace, thanks to their reliability in maintaining a high level of client service quality and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. lift Truck division located in Cleveland has a skilled team knowledgeable in Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original home-based lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled forklifts as part of a national machinery expansion venture. Initial sales of this industrialized equipment focused on large business groups, the armed forces and on state-run companies. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical education became the new focus for improving quality and product development.

Daewoo began the first domestic forklift business in 1967, and rapidly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a situation of substantial expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to respond to competitive pressures in the US materials handling industry. This endeavor greatly expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a contemporary plant which helped set up the business for the fabrication of high added-value goods suited for export. In 1993, the corporation had a global sales network and started exporting designs they had established through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
